***Titanium Ligating Clips***

**TITANIUM**

**Reliable Ligation**

# Ligating Clips

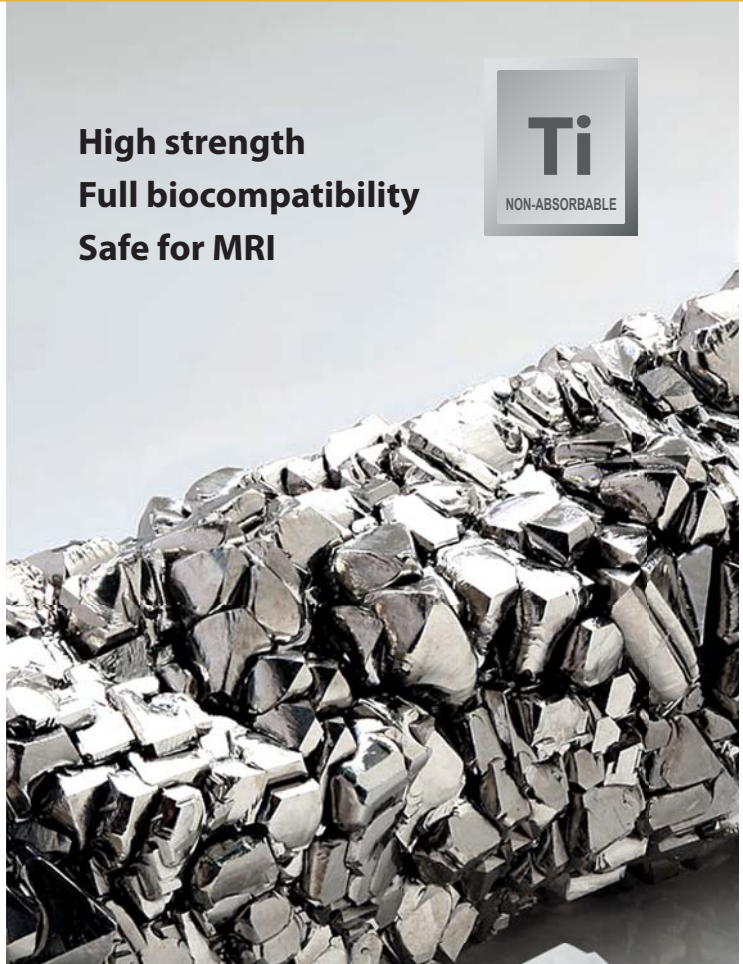

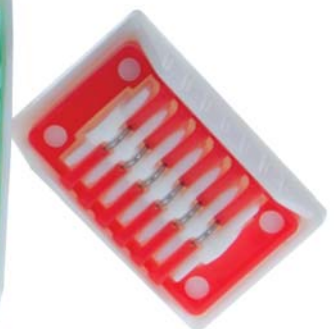

Vclip<sup>®</sup> Ligating clips are implantable medical devices. They are widely used in surgery for marking and ligating purposes. Medical practitioners value the product for its hemostatic features.

The product offered by Grena Ltd. is supplied with inner surreys that shall enhance its functions by assuring proper grip on the tissue and enabling its proper nourishment. Microstructural outer surface of clip legs and their divergence improves affixing of the clip in the applier

Vclip<sup>®</sup> clips are manufactured of a medical grade titanium which ensures proper level of biocompatibility. The applied technology guarantees the product meets the requirements of even the most demanding clinical institutes.

The product is offered in five standard sizes. Vclip<sup>®</sup> clips are delivered in colour-coded cartridges to ensure easy identification. A cartridge includes 4, 6 or 10 clips that ensure economical and comfortable use.

Clip applicators are made of the highest quality surgical grade steel. Handle rings are color-coded matching cartridge hues.

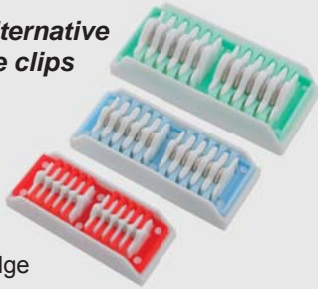

**High strength**  
**Full biocompatibility**  
**Safe for MRI**
