Benefits

Excellent placement

The high-quality stainless steel of the pre-attached disposable needle ensures an always perfectly sharp needle for optimal placement.

Easy removal

The design of the drainage channels makes the removal of the drain easy because of the low incidence of tissue growth.

Kink resistant

The structure of the drainage material ensures a high level of kink resistance.

Easy inspection

The transparent connection tube allows an easy visual inspection of the tube.

Very good biocompatibility

The channelled drainage tube is made from 100% medical silicone for very good biocompatibility.

Including J-Connector

The accompanying J-Connector allows a connection to a reservoir with internal spring.

Details

- ▶ Fully radiopaque
- ▶ Double packed, sterile
- ▶ Latex-free
- ▶ Drainage can be shortened

Technical Data

- ▶ **Drain length:** 120 cm
- ▶ **Drainchannel length:** 30 cm
