

flexxus[®]
biliary stent

Superior Design, Visible Performance

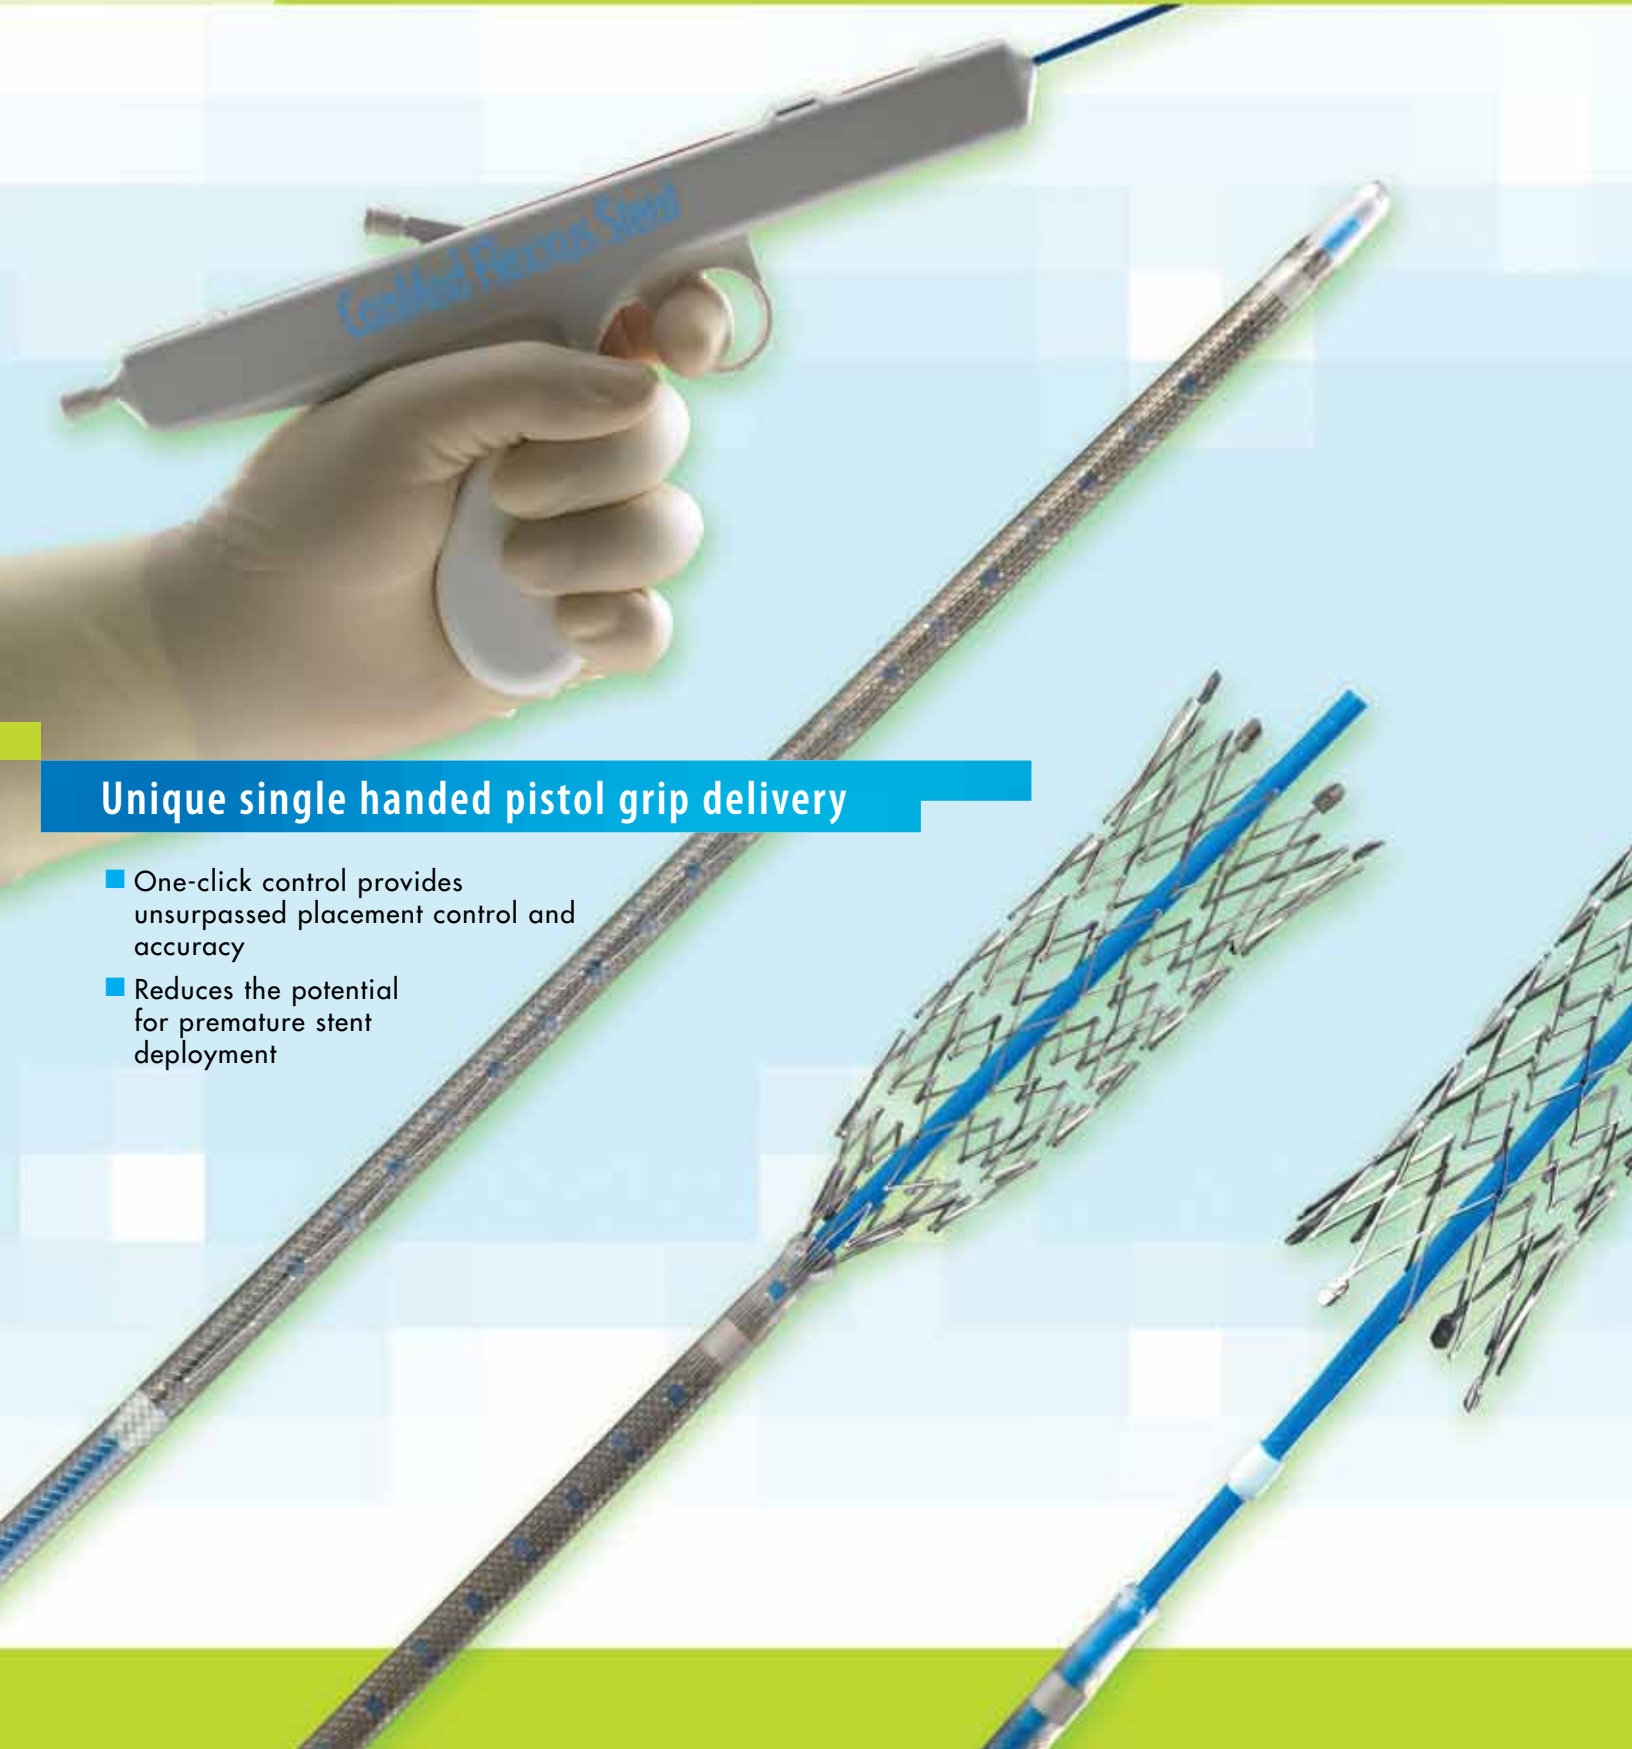

Applied Ingenuity™ |

CONMED[™]
ENDOSCOPIC TECHNOLOGIES

flexxus[®]

biliary stent

*Superior Design,
Visible Performance*

Unique single handed pistol grip delivery

- One-click control provides unsurpassed placement control and accuracy
- Reduces the potential for premature stent deployment

*For the palliative treatment
of patients with malignant
biliary strictures*

Features

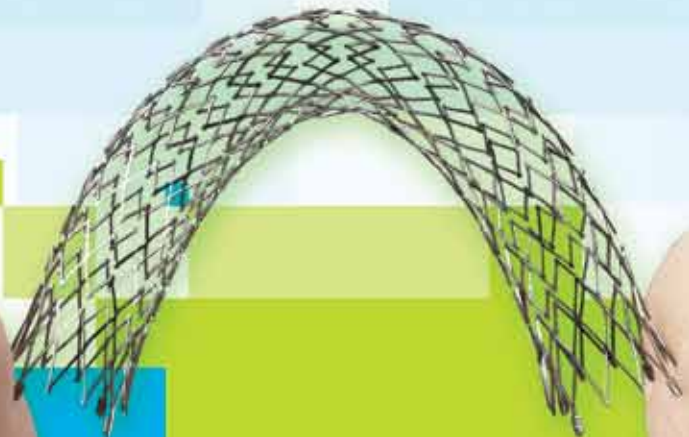

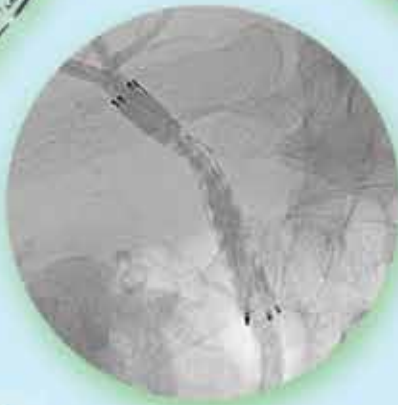

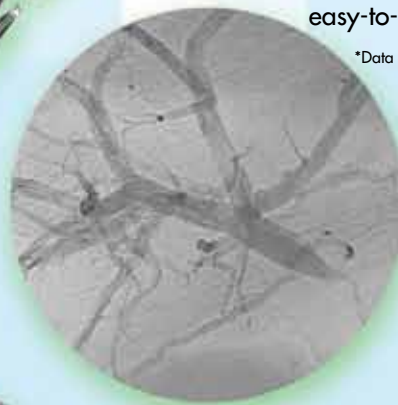

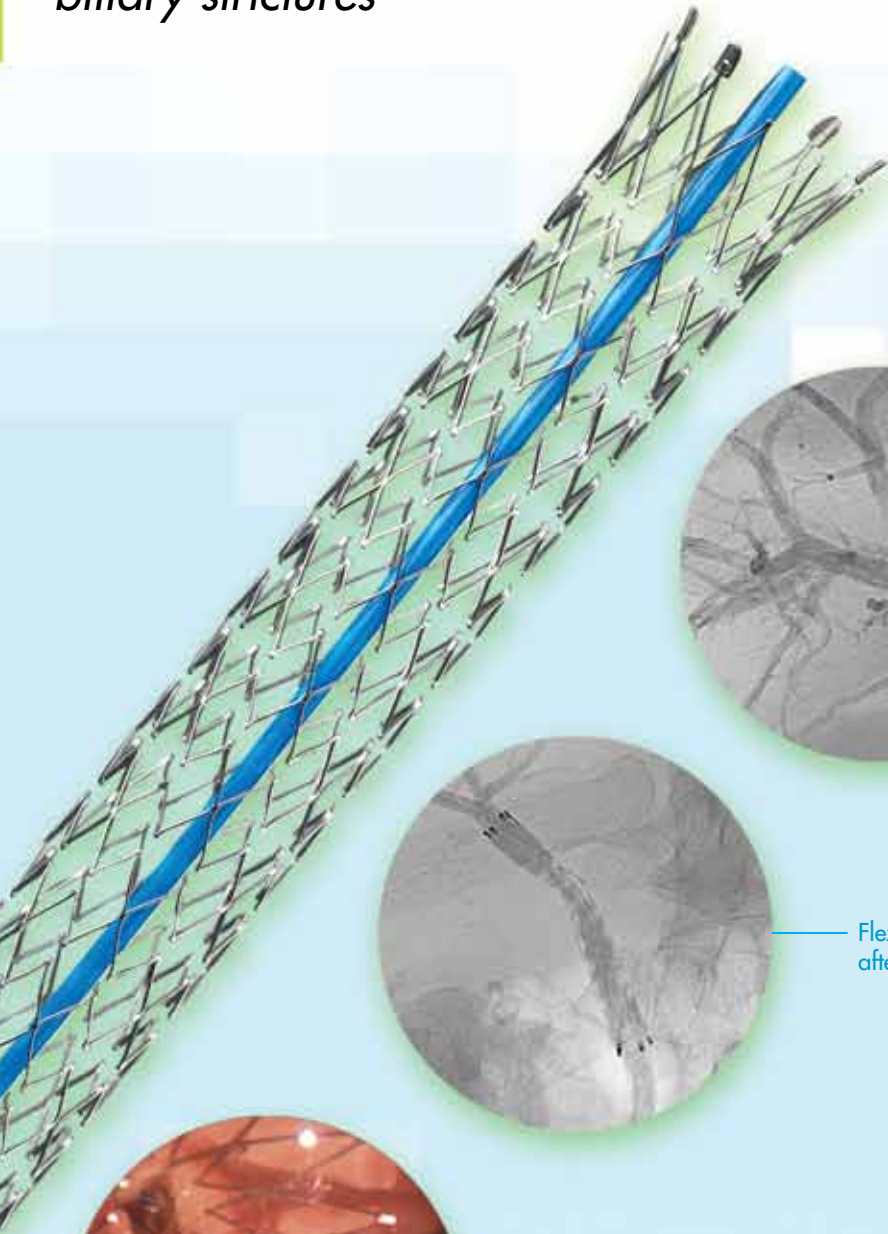

- Highest expansion force available to help maintain lumen patency
- Offering the best fluoroscopic visibility, even under difficult conditions
- Minimal shortening helps ensure accurate placement
- Highly flexible Nitinol stent design conforms even to torturous anatomy
- Flared stent ends provide excellent stent anchoring within the duct, significantly reducing the potential for migration.
- "One-click single handed pistol grip delivery easy-to-use

*Data on File

Stricture prior to Flexxus®
stent placement

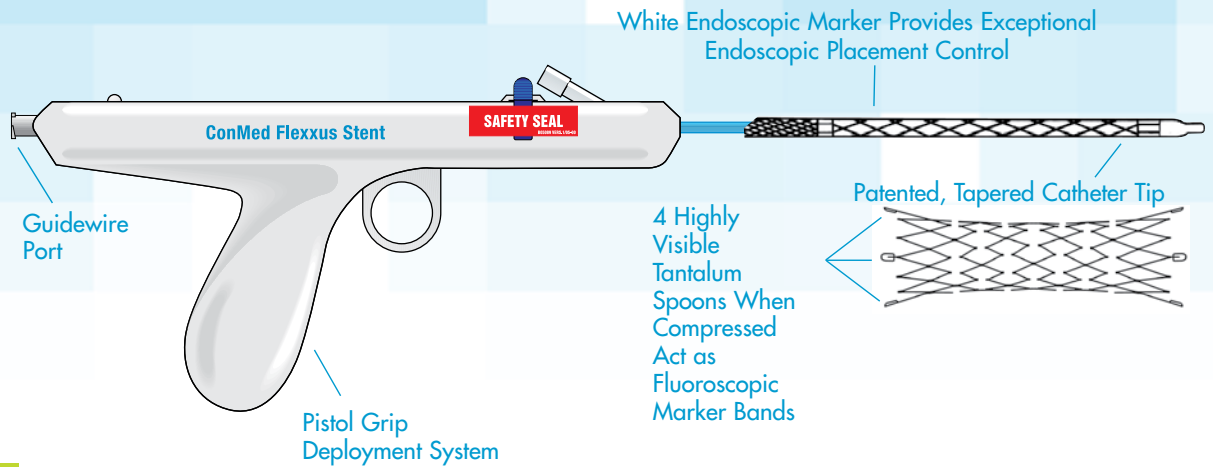

Flexxus® stent immediately
after deployment

Post deployment
