POWERED  
INSTRUMENTS  
SYSTEM™

## History

In 1963, Dr. Robert Hall introduced one of the first high-speed pneumatic drills, the Surgairtome®, which revolutionized the field of oral surgery. The success of this handpiece launched Hall® Surgical and set a new standard in performance and reliability for powered surgical instruments. This legacy carries on today through the Surgairtome Two® and OralMax® High Speed Drills available from ConMed Linvatec.

## Classic

**The Surgairtome Two®** has nearly a half century of dependability and performance and is among the most reliable oral high speed drills on the market today.

Lightweight and balanced for optimal control, feel and visibility

Highly efficient at cutting bone with minimal gas consumption

Proven reliability with Oral and Maxillofacial Surgeons

## Contemporary

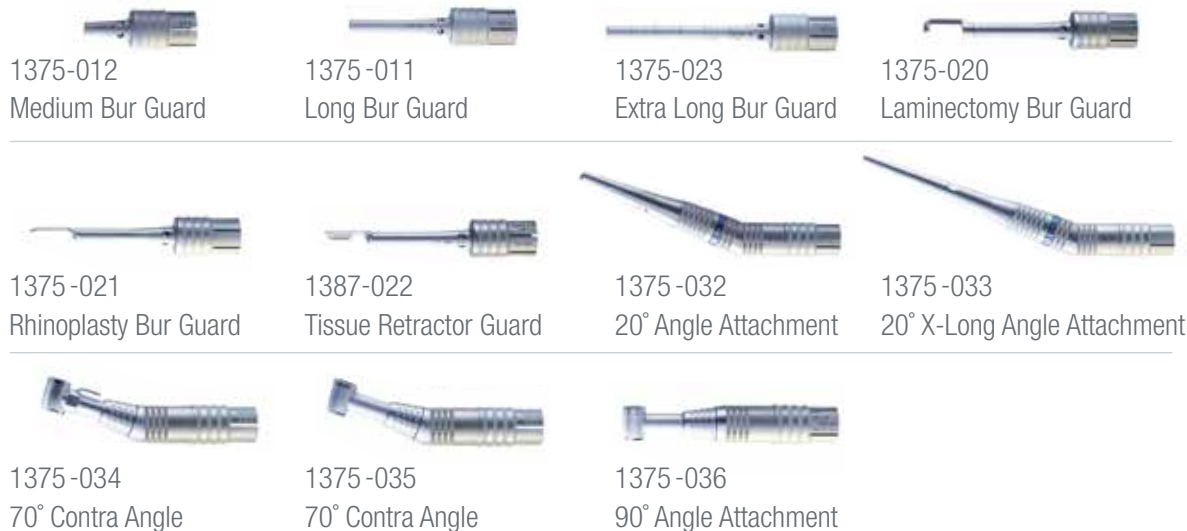

**OralMax™** is the next generation of Hall® Powered Instruments. It combines the quality and power of the Surgairtome Two, with enhanced performance and the ease of electric power.

Complete bur guard and bur integration with Surgairtome Two

Easy-care system requires no lubrication for drills and saws

## Complete

Hall accessories and burs are held to the same unmatched manufacturing standards as our drills. All burs and bur guards are interchangeable between the Surgairtome Two and the OralMax,™ creating efficiencies for multi-powered facilities and upgrading customers. A full line of consoles, instruments, batteries, attachments, pneumatic and electric accessories are also available.
